Bibliography Management System -EndNote

EndNote

- It is a multiplatform software tool that helps you manage the process of writing and preparing research papers.
- It can also manage PDF and other research files, automatically compiling key information from your files for easy reference and citation building.

Where can I get EndNote ?

Bibliography Management System

EndNote System

Download:[Link](#)

Period of Validity: 2019/1/1-2019/12/31

Introduction: With EndNote, you can import and build your personal reference bibliography. It helps you efficiently formatting bibliographies, finding full text, and searching for references.

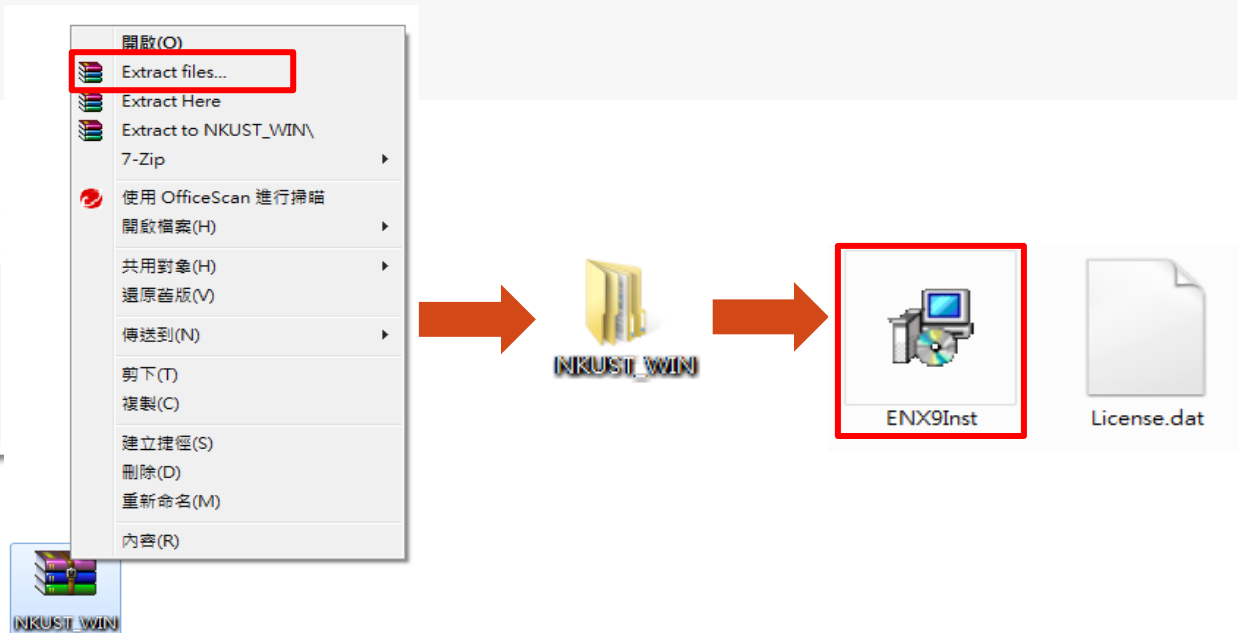

Notice

Suitable users: NKUST faculty, staff and students

The image shows the Web of Science search interface. At the top, there is a navigation bar with links to various services: Web of Science, InCites, Journal Citation Reports, Essential Science Indicators, EndNote, Publons, and Kopernio. Below this is the 'Web of Science' header. A dark blue bar contains 'Tools' and 'Searches and alerts' with dropdown arrows. A light gray box contains a 'Select a database' dropdown menu currently set to 'Web of Science Core Collection'. Below this is a search navigation bar with tabs for 'Basic Search', 'Cited Reference Search', 'Advanced Search', and 'Author Search'. The 'Basic Search' tab is active. The main search area features a large text input field containing the example text 'Example: oil spill* mediterranean' and a clear button (X). To the right of the input field is a 'Topic' dropdown menu and a blue 'Search' button, which is highlighted with a red rectangular box and a red arrow pointing to it from the right. Below the search bar are options for '+ Add row' and 'Reset'. On the left side, there is a 'Timespan' section with a dropdown menu set to 'All years (1992 - 2019)' and a 'More settings' dropdown. A large orange callout box with a white border and a pointer to the search input field contains the text 'Enter the keyword you want to search for'.

ABSTRACT

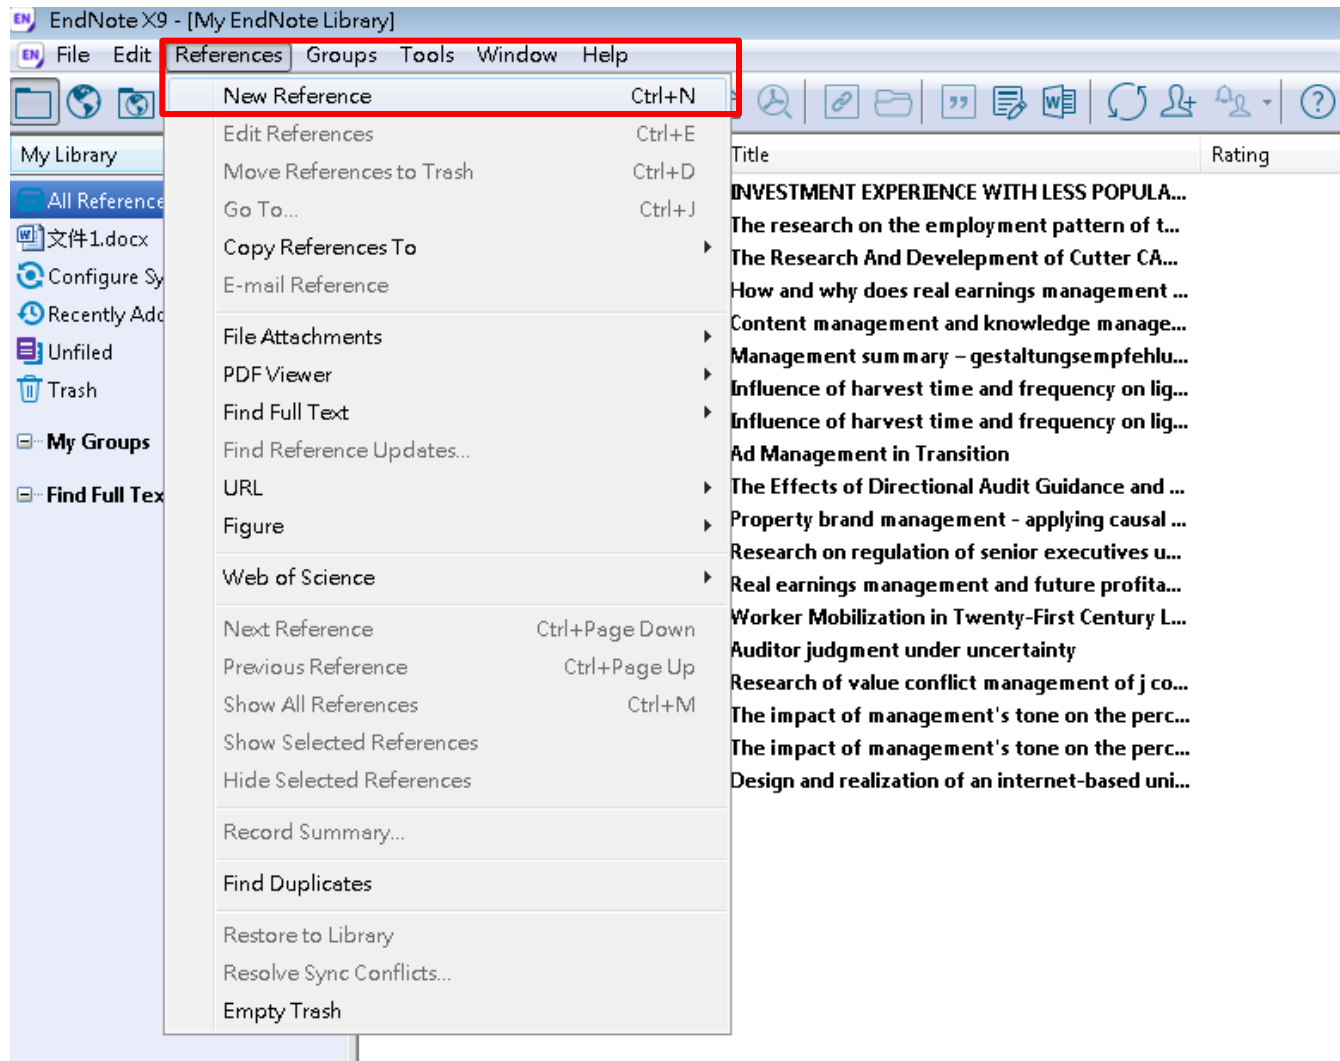

In this study, we report efficiencies of light capture and biomass yield of festulolium and tall fescue cultivated on a riparian fen in Denmark under different harvesting managements. Green biomass targeted for biogas production was harvested either as two cuts (2C) or three cuts (3C) in a year. Three different timings of the first cut in the 2C systems were included as early (2C-early), middle (2C-mid) and late (2C-late) cuts corresponding to pre-heading, inflorescence emergence and flowering stages, respectively. The fraction of intercepted photosynthetically active radiation (f_{PAR}) was derived from the canopy reflectance measured on 61 dates throughout a year, and cumulative interception of PAR (IPAR) and radiation use efficiency (RUE) was calculated. The dynamics of f_{PAR} and biomass accumulations was similar for both crops before the first cuts in all managements. Festulolium f_{PAR} in 2C-early and 2C-mid managements declined faster than in 2C-late and 3C managements in the second growth period and thus growing period IPAR of 2C-early and 2C-mid declined by 8% as compared to 3C management where IPAR was 925 MJ m⁻². Annual festulolium dry matter (DM) yield in 2C-early and 2C-mid managements (average 14.1 Mg DM ha⁻¹) decreased by 22% compared to 3C management (18.2 Mg DM ha⁻¹). The highest and the lowest RUE of festulolium were observed in 3C and 2C-mid managements as 1.97 and 1.59 g MJ⁻¹, respectively. For tall fescue f_{PAR} declined rather slowly in the second growing period in all 2C managements, which contributed to similar IPAR (908–919 MJ m⁻²), total biomass yield (16.4–18.8 Mg DM ha⁻¹ yr⁻¹) and RUE (1.80–2.07 g MJ⁻¹) for all managements. Whereas both crops were highly productive under both 3C management and 2C management with first harvest after flowering (i.e., 2C-late), the 2C-late strategy is recommended as the least intensive of the two management systems.

Entering a Reference

- Notice:
- ✓ Choose [Reference Type] first.
- ✓ When entering author names, please follow the writing rules:
 1. Enter directly if the first name is in the front, e.g. Tony Chang
 2. Add a comma if the last name is in the front, e.g., Wang, Da Ming
 3. Add 2 commas if it is a group author, e.g., National Kaohsiung University of Science and Technology,,

Changing Bibliography Styles

The screenshot shows the EndNote X9 interface. The 'References' menu is open, and the 'Choose A Style' dialog box is displayed. The 'Choose A Style' dialog box shows a list of styles with columns for 'Name' and 'Category'. The 'Nature' style is selected. The 'Style Info/Preview' button is highlighted, and the 'Style Info/Preview' dialog box is open, showing details for the 'Nature.ens' style, including its creation and modification dates, based-on style, and category. A red arrow points from a text box to the 'Select Another Style...' option in the 'References' menu.

Click "Select Another Style..." to select more style installed on your computer

Changing Bibliography Styles

i.g. Change to Nature style

Your bibliography and citations will be reformatted to match the requirements of the Nature style

涉及物質的性質及其在各個科學和工程學領域的整合應用，是一個研究材料的製備或加工工藝、材料的微觀結構與材料宏觀性能三者之間的相互關係的跨領域學科。涉及的理論包括固體物理學，材料化學，應用物理和化學，以及化學工程，機械工程，土木工程和電機工程。與電子工程結合，則衍生出電子材料，與機械結合則衍生出結構材料，與生物學結合則衍生出生物材料等等。

隨著近年來媒體將注意力大量集中在奈米科學上，材料科學在科學與工程學領域越來越廣為人知。它也是鑑識科學和破壞分析中的一個重要組成部分，以後者為例，它是分析各種飛航意外的關鍵¹。今日許多科技上的問題受限於材料能夠容許的極限，也因此，在此領域的突破在未來科技具有指標性的影響。材料科學有著廣泛的應用前景。

1 Qiao, S. *Research on regulation of senior executives under the labor law*, Huazhong (Central China) University of Science and Technology (People's Republic of China), (2011).

Changing Bibliography Styles

The screenshot shows the EndNote X9 software interface. The 'Bibliography' menu is open, and a small arrow button is highlighted with a red box. A callout box points to this button with the text: "Click the small arrow button to change more options".

The 'EndNote X9 Configure Bibliography' dialog box is open, showing the 'Format Bibliography' tab. The 'Bibliography title' field is highlighted with a red box and contains the text "Reference List". A callout box points to this field with the text: "i.g. Enter the text 'Reference List'".

The dialog box also shows other settings: Font: Calibri, Size: 12, Start with bibliography number: 1, First line indent: 0.000 cm, Line spacing: Single, Hanging indent: 1.270 cm, Space after: None. Buttons for '確定' (OK), '取消' (Cancel), and '說明' (Help) are visible at the bottom.

Background text in Chinese is partially visible, including: "涉及物質的性質及其在... 備或加工工藝、材料的... 科。涉及的理論包括固... 士工程利... 日結構材料... 某體將注意... 越來越廣為人知。它也... 例，它是分析各種飛航... 許的極限，也因此，在... 著廣泛的應用前景。"
