Engineering Village介紹與收錄內容

Engineering Village (簡稱EV)

由美國Elsevier Engineering Information Inc. 所出版，為一平台名稱，內含多個子庫，提供工程領域資訊的文獻索摘資料庫。

EV 包含資料庫

Compendex

EP Patents

EnCompassLIT

INSPEC

US Patents

EnCompassPAT

GEOBASE

WO Patents

PaperChem

GeoRef

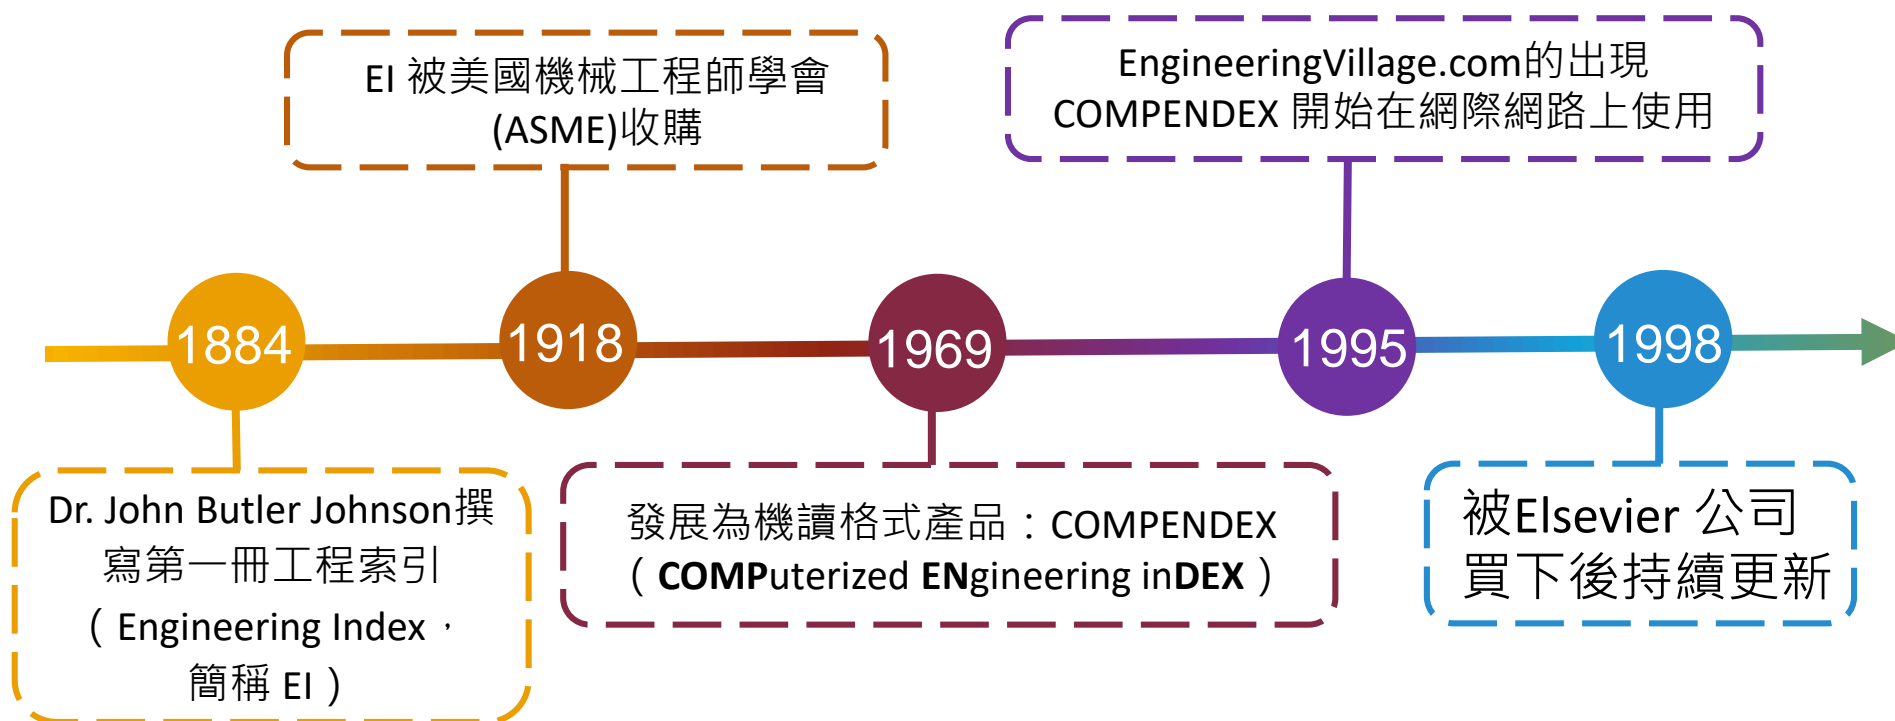

CBNB

Knovel 電子書

NTIS

Chimica

Compendex 小故事

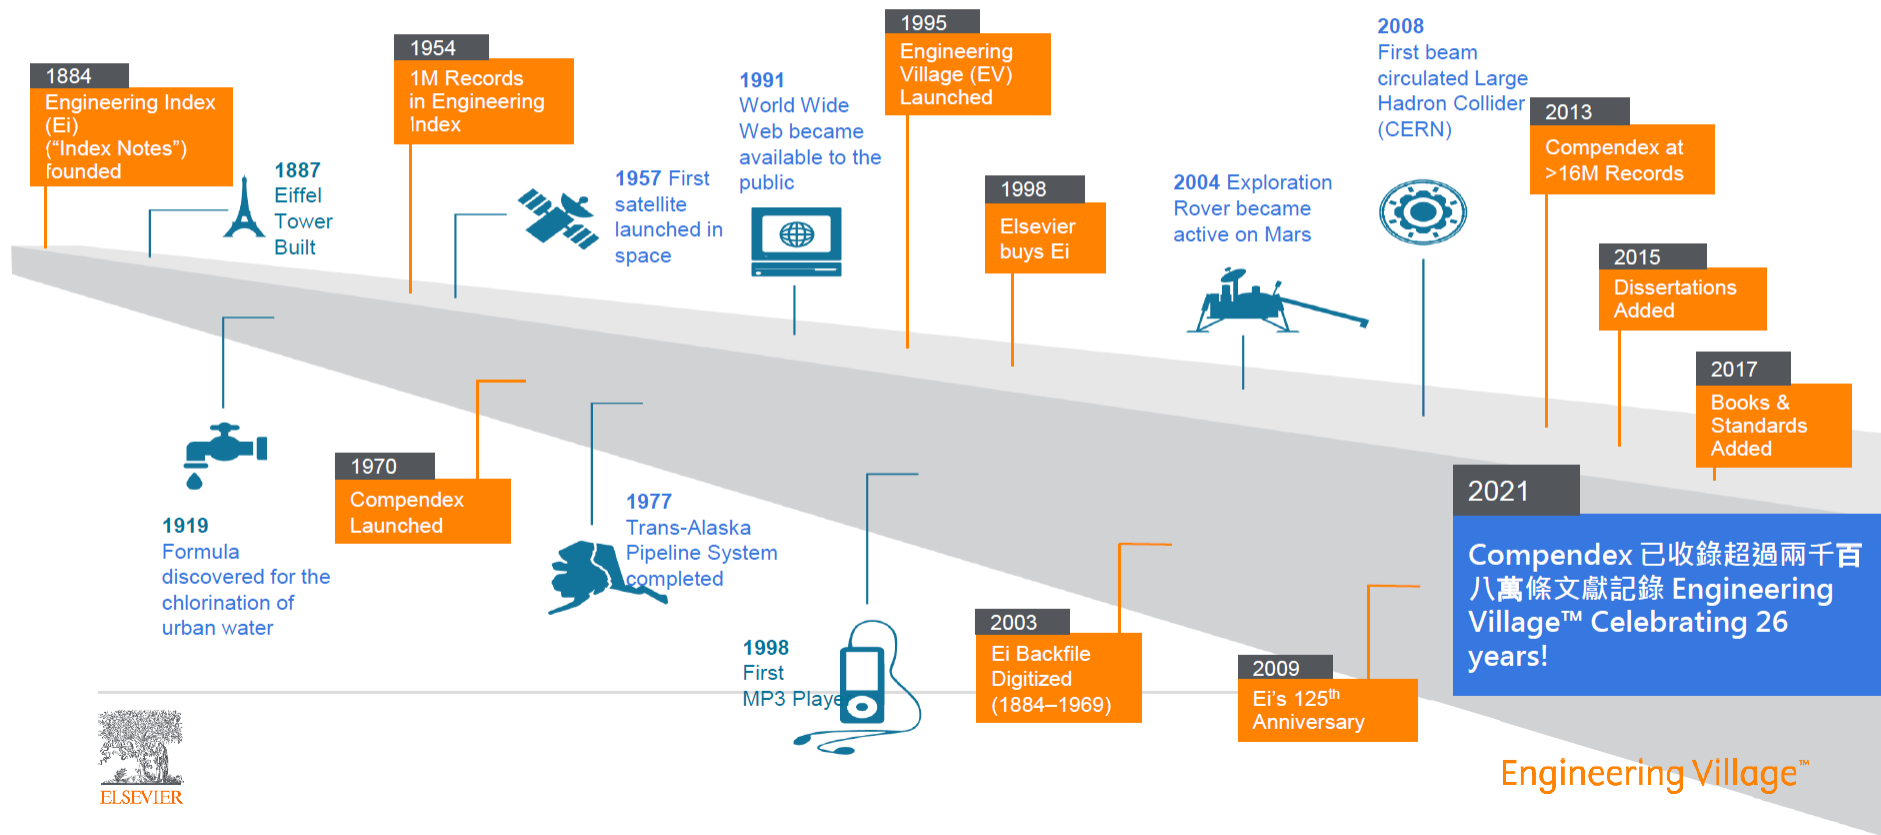

EI 為 COMPENDEX 前身，目前多以訂購 **COMPENDEX**為主

如需得知文獻是否被 EI收錄，在 **EV 平台的 COMPENDEX** 查詢即可！

Ei及Engineering Village 的里程碑

Ei 與 Engineering Village 是已確立聲譽的品牌

長達135年的工程文獻索引歷史

Engineering Village™

Compendex

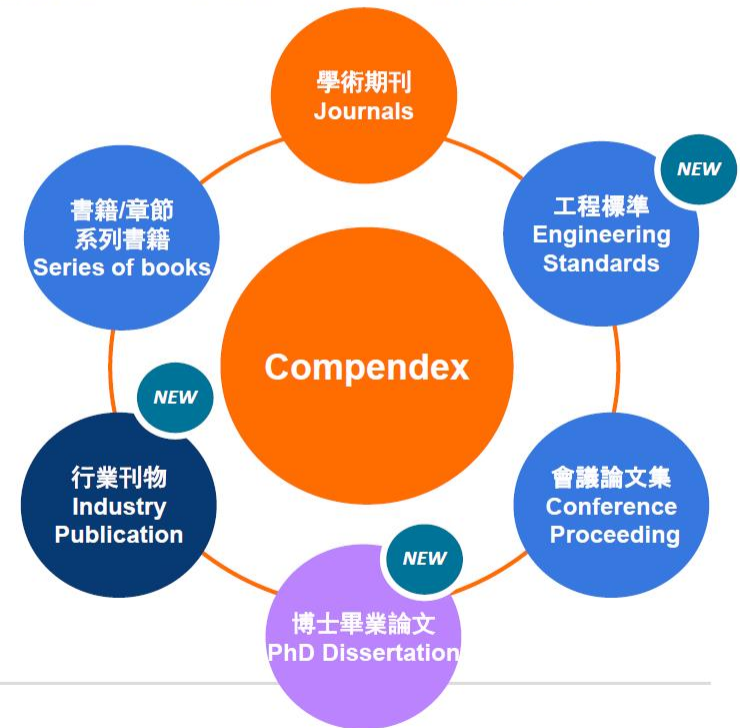

是世界上涵蓋面最廣最完整的工程文獻數據庫

 **~2800萬條** 文獻記錄 (1970年至今)
並正在持續增長

>178萬條記錄 來自Ei Backfile
1884年至1969年

每年增加
1300萬條記錄
1970年至今

 通過DOIs實現全文連結
涵蓋**190個**工程相關領域、
來自**78個**國家的**2,291個**出版社

Compendex

- 收錄年代：1969年至今
- 5,600多種工程研討會、期刊、商業雜誌、會議記錄和技術報告資料
- 資料量：超過 2200 萬筆，每年新增約 65 萬筆資料
- 包含 190 種工程領域學科，如：**化學工程**、**土木工程**、**礦業**、**機械工程**、**電子工程**、環境、結構、材料科學、固態物理學、超導體、生物工程學、能源、光學、空氣和水污染、固態廢棄物處理、道路運輸、運輸安全、應用工程、品質管理、工程管理等
- 收錄超過77個國家的出版品
- 更新頻率：每日更新
- 回溯期刊：1884年-1968年

Ei Compendex cross-disciplinary areas

INSPEC

- 收錄資料自1969年至今
- 收錄全球電子工程、電子學、物理學、控制工程、資訊科技、通訊學、電子計算機等科學文獻
- 從5000多種科學和技術性期刊、2500筆會議記錄中收錄超過1500萬筆書目摘要資料
- 資料庫每年增加約60萬筆新紀錄
- 收錄超過80個國家的出版品
- 更新頻率：每週更新
- 回溯期刊：1898年-1968年
- 需另購

EV特色—檢索利器

- **Refine Results**：提供**多種欄位**支援精確搜尋，並可做成圖表
如：控制詞彙、分類號、文件形式、刊名等（共11種）
- **專家思維**：工程領域專家學者分類之控制詞彙
– Thesaurus 索引典
- **使用者思維**：自然語彙 – Tag 標籤
- **專業的專家檢索模式**：可自行輸入搜尋語法

檢索技巧

- 右切截 (*)

- 輸入comput^{*}，可找到

computer

computers

computerize

computerization

- 萬用字元(?)

- 使用問號可以代表一個字母
 - 例如輸入wom?n，可以找到 woman
或 women的資料

檢 索 方 式

選擇檢索資料庫

Did you know?

You can now search a year range and specify any start or end year. This new feature is especially useful when saving a search alert to return results for any end year, current year.

On Quick search: select the "Date" search option and then select "Latest" for the end year.

Try Quick search

On Expert search: use an asterisk in the "YR" field to indicate an open range. Example: "artificial intelligence AND (2000-* WN YR)"

Try Expert search

☐ **Artificial intelligence** techniques for small boats detection in radar clutter. Real data validation (Open Access)

del-Rey-Maestre, Nerea ¹ ✉; Moya, David ¹ ✉; Jarabo-Amores, María-Pilar ¹ ✉; Gomez-del-Hoyo, Pedro-Jose ¹ ✉; Barcena-Humanes, Jose

Source: Engineering Applications of Artificial Intelligence, Volume 71, 2018, ISSN: 0952-1976; DOI: 10.1016/j.engai.2018.05.001

Author affiliation: ¹ Department of Signal Theory and Communications, Superior Polytechnic School, University of Alcalá, 28805 Alcalá de Henares, Madrid, Spain

Abstract: Artificial intelligence techniques were applied for detecting small moving targets in maritime clutter. A constrained Generalized Likelihood Ratio (CGLR) approach based on the Neyman-Pearson (NP) in conjunction with a neural network training sets were designed for approximating the NP detector. The detection of small boats in Gaussian clutter was the defined case study in order to assume the design hypothesis of the conventional solutions and to study their performance under their most favourable conditions. Detection schemes were evaluated using real radar data. Neural solutions based on Second Order Neural Networks provide the best results, being able to approximate the CGLR with a significantly low computational cost compatible with real-time operations.

Abstract: Artificial intelligence techniques were applied for detecting small moving targets in maritime clutter environments. Neural detectors are considered to approximate the Neyman–Pearson (NP) in composite hypothesis testing problems. Sub-optimum approaches based on the Constrained Generalized Likelihood Ratio (CGLR) were analysed, and compared to conventional implementations based on Doppler filtering that are designed to filter clutter and improve the Signal-to-Interference Ratio, and Constant False Alarm Rate techniques. The CGLR performance was significantly better at the expense of a high computational cost. As a solution, neural network training sets were designed for approximating the NP detector. The detection of small boats in Gaussian clutter was the defined case study in order to assume the design hypothesis of the conventional solutions and to study their performance under their most favourable conditions. 此功能可以瞭解此篇文章自發表後持續被使用與關注的情形，即時掌握文章被使用情形，並觀測網路上的各種意見，以促進更多的學術交流與互動。

PlumX Metrics提供5大指標：

1. **使用(Usage)**: 蒐集自資料庫點擊、下載、瀏覽、影片播放次數等
2. **擷取(Captures)**: 蒐集自Mendeley、Goodreads等，被加入書籤、我的最愛、Readers等
3. **社群媒體(Social Networks)**: 蒐集自FaceBook、Google+、Reddit等按讚、分享、轉推等
4. **引用(Citations)**: 蒐集自PubMed Central、Scopus、PMC Europe、USPTO等資料庫被引用情形
5. **提及(Mentions)**: 蒐集自部落格文章、評論、留言、維基百科等

文獻加值內容：PlumX Metrics

Artificial intelligence techniques for driving safety and vehicle crash prediction

Citation data: Artificial Intelligence Review, ISSN: 0269-2821, Vol: 46, Issue: 3, Page: 351-387

ARTICLE DESCRIPTION

Accident prediction is one of the most critical aspects of road safety, whereby an accident can be predicted before it actually occurs and precautionary measures taken to avoid it. For this purpose, accident prediction models are popular in road safety analysis. Artificial intelligence (AI) is used in many real world applications, especially where outcomes and data are not same all the

Abstract

Detailed

☐ Artificial intelligence research in the second half century

Nishida, T. ¹

Source: *Journal of Information Processing and Management*, v 55, n 7, 461-71, Oct. 2012; **Language:** Japanese; **ISSN:** 0021-7298; **DOI:** 10.1241/johokanri.55.461; **Publisher:** Japan Science and Technology Corp., Japan

Author affiliation : ¹ Grad. Sch. of Inf., Kyoto Univ., Kyoto, Japan

Abstract: Artificial intelligence research has almost completed its first stage from 1950's to today and now is proceeding to the second stage. In order to discuss the features of artificial intelligence research in the second stage, I first overview the flow of artificial intelligence research in the past and point out that the prominent contributions were a large scale search, knowledge-based system, language-speech-image processing, planning, machine learning and data mining, and amalgam of artificial intelligence and art. Then, I argue that our future target should be not just implementing high-level problem solving, but also designing communicative intelligence that will induce the user's deep empathy for integrating the human intelligence and artificial intelligence to create the intelligent future world. (14 refs.)

THESAURUS 索引典介紹

自然語言

容易因詞彙認知與用法有所差異
造成混淆及模稜兩可的情況

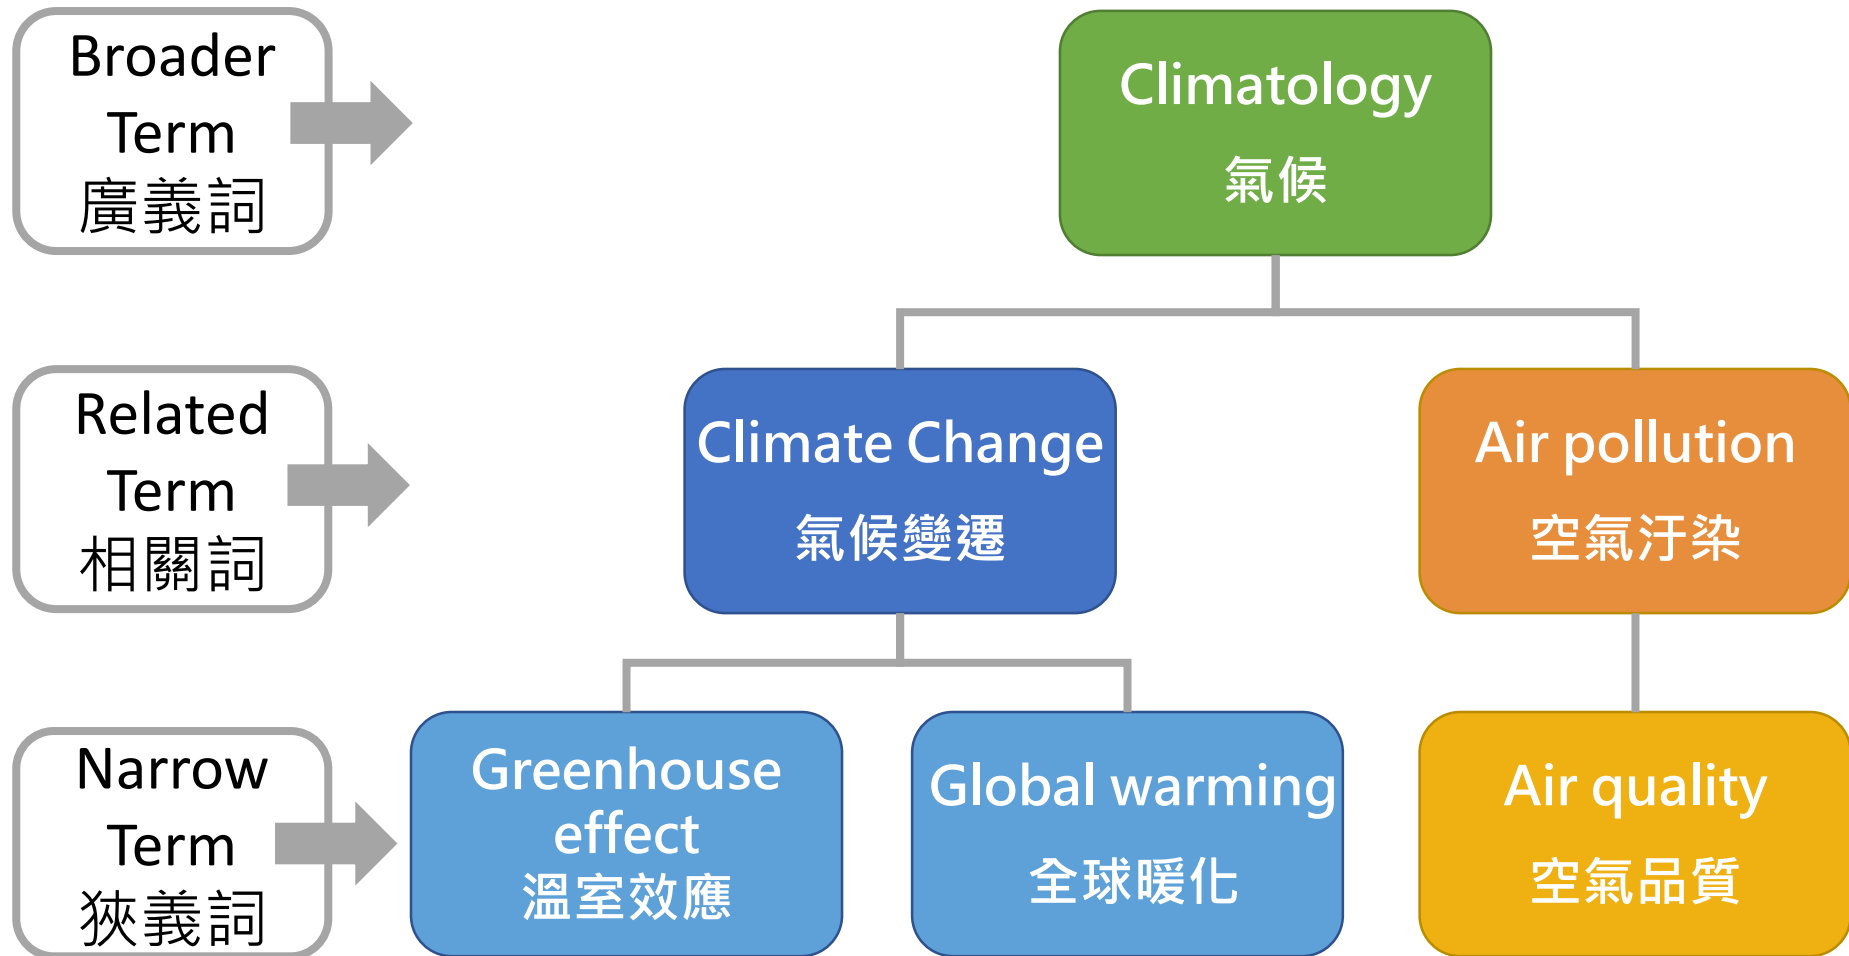

THESAURUS 索引典

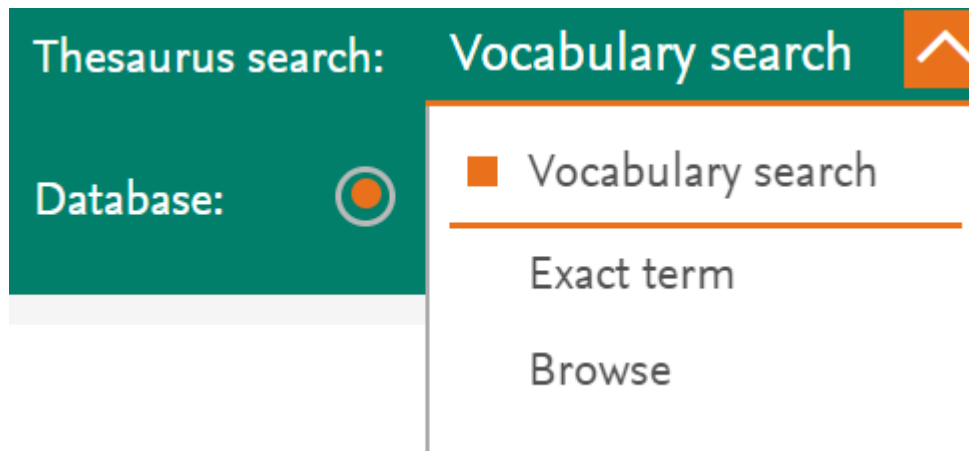

將自然語言分類重組為 **廣義詞**、**狹義詞**、**相關詞**

對同一概念採用固定的詞彙表達，以達到控制詞彙目的，
清楚呈現整個主題概念的結構，進而**提高檢索的精確度**。

Author Search – 作者檢索(直接查詢作者所著文章)

The screenshot shows the Engineering Village Author Search interface. The top navigation bar includes the Engineering Village logo, a 'Search' dropdown menu, and links for 'Results' (5), 'Alerts' (0), and 'Selected records' (0). The main search area is divided into two sections. The left section contains three input fields: 'Author last name' with the value 'Zhao', 'Author first name' with the value 'Desheng', and 'Affiliation name' with the placeholder 'e.g. Chinese Acad'. The right section contains an 'ORCID' input field with the placeholder 'e.g. 1111-2222-3333-444x' and a search button. A central dropdown menu is open, listing search options: 'Quick', 'Expert', 'Thesaurus', 'Author' (which is underlined), 'Affiliation', and 'Engineering School Profile'. A 'Reset form' button is located below the ORCID field. Two red arrows point from the input fields to explanatory text boxes. One arrow points from the left section to a box containing the following text: 'Author last name: 姓氏', 'Author first name: 名字', and 'Affiliation name: 作者所在機構'. The other arrow points from the ORCID field to a box containing the text: '或可輸入作者ORCID 直接查找'.

Abstract

Detailed

☐ Artificial intelligence research in the second half century

Nishida, T. ¹

Source: *Journal of Information Processing and Management*, v 55, n 7, 461-71, Oct. 2012; **Language:** Japanese; **ISSN:** 0021-7298; **DOI:** 10.1241/johokanri.55.461; **Publisher:** Japan Science and Technology Corp., Japan

Author affiliation : ¹ Grad. Sch. of Inf., Kyoto Univ., Kyoto, Japan

Abstract: Artificial intelligence research has almost completed its first stage from 1950's to today and now is proceeding to the second stage. In order to discuss the features of artificial intelligence research in the second stage, I first overview the flow of artificial intelligence research in the past and point out that the prominent contributions were a large scale search, knowledge-based system, language-speech-image processing, planning, machine learning and data mining, and amalgam of artificial intelligence and art. Then, I argue that our future target should be not just implementing high-level problem solving, but also designing communicative intelligence that will induce the user's deep empathy for integrating the human society and computational intelligence to augment the society of natural and artificial minds. (14 refs)

Inspec controlled terms: artificial intelligence

Uncontrolled terms: artificial intelligence research - second half century - prominent contributions - knowledge-based system - large scale search - language speech image processing - machine learning - data mining - human society - computational intelligence - artificial minds - natural minds

Classification code: C1230 Artificial intelligence

Treatment: Theoretical or Mathematical (THR)

Database: Inspec

Corp., Japan

Author affiliation : ¹ Grad. Sch. of Inf., Kyoto Univ.

Abstract: Artificial intelligence research has been proceeding to the second stage. In order to proceed to the second stage, I first overview the flow of artificial intelligence research. In the first stage, prominent contributions were a large scale knowledge-based system, large scale knowledge processing, planning, machine learning and so on. Then, I argue that our future target should be designing communicative intelligence that can interact with society and computational intelligence to a large scale.

Inspec controlled terms: artificial intelligence

Uncontrolled terms: artificial intelligence, knowledge-based system - large scale knowledge processing - learning - data mining - human society -

Classification code: C1230 Artificial intelligence

Treatment: Theoretical or Mathematical (Theory)

Database: Inspec
